

Don't overpay. Don't build in-house. Launch your loan product with **Configure™**

Configure™ Cloud Lending Solution enables you to build, launch, and manage any type of loan product end-to-end across multiple distribution channels.

01 Built specially for Africa and Emerging Markets

- For microfinance banks, rural banks, SACCOs, and cooperatives seeking one central place to manage their lending processes.
- For financial institutions seeking to expand into new loan categories or launch digital-only loan brands.
- For fintechs seeking to launch innovative digital loan products.
- For non-finance companies seeking to diversify into lending.

03 Primary use cases

- Manage loan origination, credit assessment, disbursement, monitoring, collection, and reporting in one configurable cloud web platform.
- Configure and launch a new online lending product in 24 hours with a borrower-facing client portal and branded application forms.
- Unlock new revenue streams, offer value added financial services, and start lending directly to your customers quickly and easily.

05 Automate manual work with integrated tools and services

- Analyze a PDF bank statement for credit risk in 90 seconds.
- Verify whether a borrower has a history of loan defaults, fraudulent behaviour, or late repayments.
- Automatically disburse a loan after approval.
- Automatically deduct funds via bank card or direct debit mandate on the scheduled repayment date.
- Create a branded online application form and share your application link with potential borrowers.

02 A cost-effective solution for growing businesses

- Unlike legacy cloud lending vendors, we won't take months to go-live or charge you for every single service and customization. We're built to handle multiple loan categories and remain low-cost even as you grow.
- Unlike building your own solution in-house, we won't take too long, miss deadlines, or require you to manage an entire engineering team when you should be focusing on engaging driving business growth. We're built to be reliable, agile, and compliant from day one.

04 Expand into untapped markets with a digital-only brand

- Personal loans
- SME loans
- Smartphone financing
- Laptop financing
- Rental loans
- Vehicle financing
- Asset financing
- Mortgage loans
- Point-of-sale loans
- Invoice financing

WHY FORWARD-THINKING LENDERS SWITCH TO CONFIGURE™

End-to-end

All the tools and integrations your team needs to manage, from loan origination and creditworthiness assessment to disbursement and collection management.

Low-cost

Pay one simple monthly, quarterly, or annual subscription fee, depending on the features and services you need. No need for expensive hardware or software.

Speed

Configure and launch a new loan product in 24 hours. Or migrate your existing products and go-live in 10-20 days. Never miss another launch deadline.

Custom-fit

Easy to setup the system to suit your in-house workflows, approval structures, and other requirements. No expensive customization fees.

Extra Value

Free customizable application forms, customer control panel, mobile app, loan marketplace listing, and access to engineered secured lending pools included
